

Efficiency in food and energy processes

GEA Delbag filter solutions for laboratories, hospitals, and industrial applications

Ceiling air outlets for extra-pure room air

The GEA ceiling air outlets CGF and CGG assure hygienic conditions. They are available with various HEPA filters with proven minipleat design and, as final filter stage, separate particles of all kinds – including viruses and microorganisms – before the air enters the room. They feature effective U-channel seals or fluid seals for optimal filter seating. The air outlets have compact dimensions and allow uncomplicated change of filters. As a result, they are highly effective for laboratories and the pharmaceutical, food and beverage, and semiconductor industries. They are just as well suited for use in hospitals: e.g., in Type-B operating wards, maternity wards, and in intensive care.

GEA ceiling air outlets with minipleat HEPA filters separate particles of all kinds, including microorganisms.

About GEA

GEA Group Aktiengesellschaft is one of the largest systems providers in the food and beverages industries and in energy production. Group sales in 2010 were more than 4.4 billion euros. As an internationally active technological enterprise, GEA Group has concentrated on process engineering and components for demanding production processes in a wide range of end-user markets. The Group generates around 70 % of its sales in long-term growth industries for food, beverages, and energy. As of 31 December 2010 the Group internationally employed more than 20,000 staff. In its business areas, GEA Group is among the leading companies on the market and in technological developments. GEA Group is listed on the German MDAX stock index (G1A, WKN 660200).
