## **DONG continues collaboration with Nexans**

*DONG Energy and Nexans conclude framework contract  
for medium-voltage submarine cables*

**Hanover, 2. February 2012** – DONG Energy, Fredericia (Denmark) and Nexans Deutschland have concluded a framework agreement for the delivery of up to 900 kilometres of medium-voltage submarine cables. Up until the end of 2015 (or, optionally, 2017), the Danish energy company will take delivery of up to 150 kilometres of high-performance cables every year for new offshore wind farms to connect the individual wind turbines with each other and with the transformer platforms at sea. The installation and delivery of accessories are additional contract options associated with the delivery of submarine cables for Borkum Riffgrund 1, Borkum Riffgrund 2 and West of Duddon Sands as well as for other planned projects. In the past, DONG Energy has awarded cable installation contracts for the Horns Rev 1, Horns Rev 2 and Anholt wind farms to Nexans Deutschland.

“The scale of this contract and the fact that DONG Energy is once again ordering submarine cables for offshore wind farms from Nexans demonstrate the quality and competitiveness of our products”, says Christof Barklage, CEO of Nexans Deutschland.

At high sea: Nexans Deutschland has many years of experience with the challenges of offshore wind farms.

## **Nexans Germany**

Nexans Germany is one of the leading cable manufacturers in Europe. The company is offering an extensive range of high performance cables, systems, and components for the telecommunications and energy sectors, rounded off by superconducting materials and components, Cryoflex transfer systems and special machinery for the cable industry. Producing at manufacturing plants with 7.260 employees in Germany and abroad, the sales in 2010 amounts to approx. 810 Mio Euro. The full integration into the Nexans Group Nexans Germany also benefits from excellent opportunities to use the available synergies in all corporate fields, which not only applies to worldwide projects but also to research and development, the exchange of know how, and to other areas.
